KINSHUK AGGARWAL

SOFTWARE DEVELOPER

SECURITY TESTER

PROFESSIONAL SUMMARY

Android & Software Developer with hands-on experience building production-level apps in Kotlin and Python. Delivered gesture-based transfer systems, QR attendance solutions, and automation

PROJECTS

- **NAAI Platform — Booking & Partner Management System** naai.co.in | partners.naai.co.in
  - Built booking platform with public website, partner portal, and mobile apps
  - Developed cross-platform apps in React Native for customer booking and partner management.
  - Implemented booking workflows, onboarding, and service dashboards.

- **QRLogger — Event Attendance Tracker (Android)**
  - QR-based system for tracking attendee check-in/out during events.
  - **Tech:** Kotlin, CameraX, SQLite
  - **Role:** Built QR scan pipeline & automated logging.

- **Gestro – Cross-Device Gesture-Based File Transfer platform**
  - Privacy-focused photo transfer system using gestures over l local Wi-Fi.
  - **Tech:** Kotlin, Local Server, Python
  - **Role:** Engineered gesture workflow & transfer system.

- **GestroWin — Desktop Companion App**
  - Windows utility for receiving and organizing files from Gestro.
  - **Tech:** Python, PyQt
  - **Role:** Developed receiver service and optimized file handling.

gestro.dev

Panchkula, Haryana, India

SKILLS:

- Python (Core)
- Kotlin
- Android Studio
- Visual Studio Code
- Manual Testing
- Git & GitHub
- SQL
- AI-Assisted Development
- Prompt Engineering

TOOLS:

- VS Code
- GitHub
- Android Studio
- Visual Studio Community 2022
- Postman

INTERESTS:

- App Development
- Automation
- Testing
- Cybersecurity

LANGUAGES:

- English
- Hindi

EXPERIENCE

- **Software Tester —Webtek Wizards** **2025 – PRESENT**
  - Conducted security and functional testing on mobile and web apps, identifying vulnerabilities and performance issues.
  - Discovered critical security flaws that helped prevent potential legal and compliance risks.
  - Created and executed test cases, test plans, and detailed bug/vulnerability reports.
  - Reported bugs and vulnerabilities using Postman, Git/GitHub, Selenium (basic), and manual testing

PERSONAL DEVELOPMENT EXPERIENCE

- **Independent Android Developer** **2023 – PRESENT**
  - Built Android apps, desktop tools, and automation utilities.
  - Experience with Kotlin, Python, CameraX, PyQt, and networking.
    Developed production-level systems including NAAI, Gestro and QRLogger.

LEADERSHIP & TECH OPERATIONS **2024 – 2025**

- **Model United Nations (Technical Operations Lead)**
  - Managed all technical and digital operations during MUN events.
  - Led QRLogger deployment across a 3-day event, managing 3,000+ attendee scans with 99% accuracy and zero downtime.
  - Set up scanning stations, trained volunteers, and handled data flow during events.
  - Ensured smooth event workflow with accurate check-in/out records and zone tracking.
  - Coordinated with event organizers to solve real-time technical issues.
  - Improved event speed and accuracy through automation and efficient app usage.

CERTIFICATIONS

- **App Developer Certificate – Recognized for Android & Software Development**
- **Hackathon Certificate – FIRST PRIZE Winner (x2)**
- **Technical Operations Certificate (MUN)**

Education

- **Class 10 (CBSE)** — Currently studying
- Strong interest in Science, Mathematics, and Computer Programming

Achievements

- 2× First Prize Hackathon Winner
- Deployed QRLogger in live events
- Built 5+ production tools
- Technical Ops Lead – MUN
